

LUKE BARTELS

I earned a Bachelor of Design from Edith Cowan University in 2018, majoring in Games and Interactivity with a minor in Animation. Digital design has been a longstanding passion of mine, and my proficiency in graphic design, animation, and programming has proven valuable in overcoming design challenges. With a versatile skill set, I thrive both individually and as part of a team, delivering projects efficiently.

In my previous role, I dedicated myself to enhancing my expertise in motion graphics and project management. Alongside my interest in digital design, I enjoy building computers, photography, videography, and content creation. I constantly seek opportunities to expand my skill set, and recently have dived into 3D tools.
